

Joshua Khooba

Software Engineer | Full-Stack & iOS Development

Ocala, FL | (352) 456-9087 | JoshuaK419@gmail.com | linkedin.com/in/joshua-khooba | github.com/JoshuaKhooba | joshuakhoooba.com

EDUCATION

University of Central Florida | B.S. Information Technology Orlando, FL • May 2026
• Coursework: Data Structures & Algorithms, Operating Systems, Enterprise Computing, Databases, Networking, Cybersecurity
• Certifications: AWS Academy Cloud Security Foundations; TestOut IT Fundamentals Pro • UCF Tennis Team

College of Central Florida | A.A. Computer Science Ocala, FL • May 2022

TECHNICAL SKILLS

Languages	Python, TypeScript, JavaScript, Java, C, Swift, SQL, Go, PHP, HTML5, CSS3, Bash
Frontend	React, Next.js, SwiftUI, React Native, PyQt6, CesiumJS, Three.js, Tailwind CSS, Redux Toolkit, Framer Motion
Backend	Node.js (Express), Python asyncio, Java Servlets/JSP, Spring MVC, Django, REST, WebSockets, Prisma ORM, JDBC
Data	PostgreSQL, MySQL, SQLite, MongoDB, DynamoDB, Supabase, Firebase, Pandas
Cloud & DevOps	AWS (Cognito, S3, Lambda, EC2, IAM), Docker, GitHub Actions, CI/CD, Linux, Vercel, Git
AI & Testing	Gemini Live API, Claude API, LLM tool calling, agentic workflows, LLM evaluation, Playwright, Jest, JUnit

EXPERIENCE

LinkedIn | AI Trainer (Contract) Remote • Jul 2026 – Present
• Evaluate and annotate complex datasets to improve response quality, factual accuracy, and reasoning of production LLMs across large-scale AI infrastructure projects.
• Validated thousands of model responses, isolating recurring failure patterns in edge cases and ambiguous prompts, and delivered structured feedback that helped engineering and research teams refine annotation standards.

Best Buy — Geek Squad | Geek Squad Consultant (Part-Time) Ocala, FL • Sep 2026 – Present
• Troubleshoot, configure, and set up computers, phones, and smart devices across Windows, macOS, iOS, and Android, expanding the store's technical support capacity and reducing customer wait times.
• Rehired after a prior 3.5-year tenure (Jun 2021 – Nov 2024), where I earned **MVP recognition** (Jul 2022) for consistently exceeding monthly targets.

Asurion uBreakiFix | IT Technician Winter Park, FL • Mar 2026 – Jun 2026
• Debugged software and hardware failures across iOS, Android, and Windows at **50+ devices/week** with a **95%+ first-time fix rate** through systematic root-cause analysis.
• Supported **30+ customers daily** and tracked **200+ parts** with QC procedures, cutting repair delays **25%**.

The Walt Disney Company | VIP Operations Intern Orlando, FL • Jan 2025 – Jan 2026
• Ran backend scheduling for **100+ VIP itineraries weekly** across enterprise platforms, coordinating guides and transportation to sustain a **98% on-time execution rate**.
• Processed **1,000+ booking records monthly** with **zero data-entry errors** via repeatable QC checks.

Orange County Government | Data Analysis Intern Orlando, FL • Aug 2022 – Jan 2023
• Automated extraction of **10,000+ infrastructure records** from the IBM Maximo REST API with Python and GIS queries into structured datasets, cutting retrieval time **30%** under a Public Security Clearance.

PROJECTS

J.A.R.V.I.S. — Real-Time Voice AI Desktop Assistant | Python, asyncio, Gemini Live API, PyQt6, CesiumJS, WebSockets • GitHub
• Built a cross-platform voice assistant on the Gemini Live API with low-latency audio streaming, live screen and webcam vision, and persistent memory, exposing **55+ tools** the model invokes mid-conversation across **30+ action modules**.
• Embedded a Cesium 3D-globe command center (God's Eye View) in a custom PyQt6 HUD and drove it by voice over a local HTTP bridge with **27 geospatial tools** for live flight tracking, ISS pass prediction, and map annotation.
• Integrated Gmail, macOS Calendar/Reminders, and Obsidian, plus a WebSocket phone dashboard and one-command npm launcher.

EcoVest — Clean-Energy Investment Platform (Lead Developer) | Next.js, TypeScript, Prisma, NextAuth, Gemini API • GitHub • Live Demo
• Shipped a paper-trading platform in a **12-hour hackathon** (BloomKnights at UCF) covering **19 mock equities/ETFs**, with an explainable reallocation engine scoring clean-energy rating, return, and volatility plus Gemini-generated rationale behind JWT auth.

Disney VIP App — iOS Client | Swift, SwiftUI, MVVM, Supabase, Claude API • GitHub
• Delivered a full-SDLC iOS app across **15+ SwiftUI views** (auth, reservations, events, check-ins) with real-time Supabase sync, Claude API integration, and MVVM layering.

Three-Tier Distributed Web Application | Java Servlets, JSP, Apache Tomcat, MySQL, JDBC • GitHub
• Engineered an enterprise three-tier system separating presentation, servlet business logic, and MySQL data layers, routing **four privilege tiers** to permission-scoped interfaces after credential login.
• Prevented SQL injection with `PreparedStatement`, served aggregation reports via `CallableStatement` stored procedures, and logged every operation to an audit table.

Space Portfolio | Next.js 14, TypeScript, Three.js / React Three Fiber, Tailwind CSS, Framer Motion • Live Site • GitHub
• Built a responsive personal site with an animated 3D starfield, scroll-triggered motion, and content-driven sections from a single typed constants module; deployed on Vercel with a custom domain.
